Portfolio · LinkedIn · GitHub

PROFESSIONAL SUMMARY

Flutter Developer specializing in scalable, high-performance Android & iOS applications, with production apps live on Google Play and a full-stack commercial product built end to end. Expert in Dart, BLoC/Cubit, Riverpod, Clean Architecture and SOLID principles, with hands-on experience integrating RESTful APIs, Firebase, Supabase and AI services (Gemini, Vapi, fal.ai). Known for writing clean, testable code and for delivering polished UI/UX on time within Agile teams, code reviews, Git workflows and CI/CD pipelines.

WORK EXPERIENCE

Flutter Developer — Innoscribe

Feb 2026 – Present

Oslo, Norway (Remote) · **Live on Google Play**

- Build and enhance production-ready features for a live app using **Flutter, Dart and BLoC/Cubit**.
- Designed a maintainable codebase with **Clean Architecture**, dependency injection and the repository pattern.
- Integrated REST APIs, Firebase and **AI voice services (Vapi)**; developed advanced assistant-update workflows with admin approval logic and API integration.
- Improved application responsiveness, state synchronization and UI consistency across the app.

Flutter Developer Intern — Babylon

Oct 2025 – Jan 2026

Dublin, Ireland (Remote) · **Live on Google Play**

- Developed and maintained mobile features with **Flutter, Dart and Provider** within a clean architecture.
- Integrated RESTful APIs and Firebase services; used Git for version control in a collaborative team workflow.
- Contributed to the published Babylon app through bug fixes, performance tuning and UI/UX enhancements.

Independent Flutter Projects

Jan 2023 – Present

Self-directed · Remote

- Designed, developed and launched cross-platform apps end to end across **EdTech, ERP, fashion AI and productivity** domains.
- Improved app stability and reduced recurring bugs through **disciplined testing and debugging**, Clean Architecture and SOLID principles.
- Integrated RESTful APIs for real-time data exchange and seamless system interaction.
- Maintained CI/CD workflows (GitHub Actions) for automated testing and delivery.

PROJECTS

EDARIO — Education Management Platform

Full-Stack Commercial Product

- Complete **full-stack platform built end to end — Flutter frontend with a Supabase + Firebase backend** — that runs an entire educational institution: student enrollment, attendance, payments & expenses, exams, payroll and reports.
- Airtight financial control with a full audit trail: cash, payments and dues tracked precisely, showing who paid, who is late and who attended in real time — no paperwork, no leakage.
- Role-based portals for owners, teachers, students and parents, plus live dashboards for revenue, expenses, net profit and course/staff performance from a phone.
- **AI-assisted exam creation**: generates exams, extracts questions from images and PDF files, and accelerates grading and follow-up.
- Offered as a hosted product or fully **white-labeled** per institution — custom name, logo, colors and an independent database.

LookOn — AI Virtual Try-On

github.com/AhmedAljamal15/look-on-app

- Flutter app that lets users photograph any garment and see a realistic **AI-generated preview** of themselves wearing it (FASHN.ai via fal.ai) — tops, bottoms, dresses and full-body pieces.
- Feature-first Clean Architecture with **Riverpod** and go_router; Firebase Auth & Firestore with Supabase Storage.
- Full Arabic/English localization (RTL & LTR), favorites & history, body measurements, daily usage limits, offline detection and **GitHub Actions CI/CD**.

Smartel ERP (Bavix)

github.com/AhmedAljamal15/Bavix

- Modern ERP mobile app covering HR, customers, items, sales orders, invoices, delivery notes, attendance and payroll, integrated with **ERPNext RESTful APIs** for real-time business workflows.
- Built the **"Bavix AI" copilot** (Firebase AI / Gemini): conversational workflows, intelligent search, ERP action routing and persistent multi-session chat memory; Clean Architecture + BLoC/Cubit.

Burger King App

github.com/AhmedAljamal15/BurgerKingApp

- Fast-food ordering app with glassmorphism UI and smooth animations, **3D product previews** (Model Viewer), real-time cart with item customization, secure auth with guest mode, and lazy-loaded responsive layouts; Flutter, Dio, MVVM.

Word2Pdf

github.com/AhmedAljamal15/Word2Pdf

- Instant Word→PDF converter (.docx/.doc/.rtf/.odt) with in-app preview, conversion history and sharing — Flutter frontend + Flask/LibreOffice backend, Dockerized and deployed live on Railway.

Task Mate

github.com/AhmedAljamal15/Task-Mate

- Offline-first task manager with full CRUD, calendar date ranges, smart sorting and search — Flutter, BLoC and Hive local storage.

SKILLS

Mobile Development	Flutter, Dart, Android Native (Kotlin), Responsive & Adaptive UI, Animations
State Management	BLoC, Cubit, Provider, Riverpod
Architecture	Clean Architecture, MVVM, MVC, SOLID Principles, Clean Code, Repository Pattern, Dependency Injection
Backend & Data	RESTful APIs, Firebase (Auth, Firestore, Firebase AI), Supabase, SQLite, Hive
AI Integration	Gemini, Vapi (voice AI), fal.ai / FASHN.ai, conversational AI workflows
Tools & Workflow	Git/GitHub, CI/CD (GitHub Actions), Testing & Debugging, Analytics, Postman, Jira, Slack, Android Studio, VS Code
Other	Python, Flet, Payment Integration (Stripe & PayPal)
Soft Skills	Communication, Teamwork, Time Management, Problem Solving, Attention to Detail, Adaptability

EDUCATION

B.Sc. Information Technology & Computer Science

2018 – 2023

Sinai University — Faculty of Information Technology & Computer Science

CERTIFICATIONS & TRAINING

- **Flutter Developer** — ITI (Egyptian Ministry of Communications & Information Technology): formal certification covering cross-platform mobile application design and deployment.
- **CS50's Introduction to Programming with Python** — Harvard University: completed nine problem sets and a final project.
- **Courses:** Flutter Payment Integration (Stripe & PayPal) · Mastering Flutter: Responsive & Adaptive UI Design · Complete Flutter & Dart Development

LANGUAGES

Arabic — Native · **English** — Intermediate · **German** — A1

VOLUNTEERING

- **Be My Eyes** — assisted visually impaired individuals with real-time support and guidance through the mobile application.
- **Harvard Society** — supported learners by answering programming questions and providing guidance on available courses.

ADDITIONAL INFORMATION

Military Service: Completed (Sep 2024 – Sep 2025)
