Ahmed Gad Mahmoud

Flutter Developer

Cairo | + 201552582516 | ahmed.gadaljamal@gmail.com
http://www.linkedin.com/in/ahmed-gad-a605061aa | GitHub

Professional Summary

Flutter Developer experienced in building scalable, high-performance mobile applications for Android and iOS. Strong problem-solving and attention to detail. Proficient in Flutter, Dart, and advanced state management (BLoC, Provider). Expertise in API integration, Clean Architecture, and SOLID principles. Skilled in Agile, Git version control, and CI/CD workflows to ensure timely, high-quality delivery. Dedicated to implementing innovative solutions that optimize performance and enhance UI/UX in line with business goals

Professional Experience

Flutter Developer – Freelance Projects | January 2023 – Present

- Designed and developed cross-platform mobile applications with a focus on performance and usability.
- Implemented Clean Architecture and MVVM for maintainable and scalable codebases.
- Integrated RESTful APIs for real-time data exchange and seamless system interaction.
- Utilized Git for version control and collaborative project management.
- Conducted testing, debugging, and optimization to improve stability and user satisfaction.
- Improved app stability and reduced crash rates by 25% through efficient debugging and testing practices.
- Optimized code quality and reduced bug reports by 30% via Clean Architecture and SOLID principles.
- Strong understanding of mobile development lifecycle (Android & iOS).
- Participate in Agile development processes and code reviews
- Strong problem-solving skills and attention to detail.

Education

Bachelor of IT & Computer Science | Sinai University – Faculty of Information Technology & Computer Science
Jan 2018 – Sep 2022

Training Courses

- **Flutter Payment Integration Stripe & PayPal**
- **ITI Certificate in Flutter Development**
- **CS50's Introduction to Programming with Python** | Harvard University
- **Mastering Flutter: Responsive & Adaptive UI Design**
- **Complete Flutter & Dart Development**

Work Experiences

Flutter Developer (Innoscribe App) Google Play
Oslo, Norway – Remote | 2 / 2026 - Present

- Built and enhanced production-ready mobile application features using Flutter, Dart, and Bloc/Cubit.
- Designed maintainable codebase architecture using Clean Architecture, dependency injection, and repository pattern.
- Integrated REST APIs, Firebase, and AI-based voice services (Vapi).
- Developed advanced assistant update workflows with admin approval logic and API integration.
- Improved application responsiveness, state synchronization, and UI consistency.

Flutter Developer Intern (Babylon App)
Babylon, Dublin, Ireland – Remote
10 / 2025 – 1 / 2026

- Developing and maintaining mobile features using Flutter and Dart.
- Working with state management Provider and clean architecture.
- Collaborating with the team to fix bugs, improve performance, and enhance UI/UX.
- Integrating RESTful APIs and Firebase services and using Git for version control.
- Contributed to the development of the "Babylon" mobile app, available on Google Play

Bavix (Smartel ERP System)

- Developed a modern ERP mobile application using Flutter and Dart.
- Implemented ERP modules for HR, customers, items, sales orders, invoices, delivery notes, attendance, and payroll management.
- Integrated ERPNext RESTful APIs for real-time ERP operations and business workflows.
- Added an AI copilot assistant "Bavix AI" using Firebase AI / Gemini for smart ERP interactions.
- Implemented conversational AI workflows, intelligent search, and ERP action routing.
- Added persistent local chat memory and multi-session AI conversations.
- Applied Clean Architecture and BLoC/Cubit state management for scalable and maintainable development.
- Improved mobile UI/UX experience with responsive and modern Flutter design principles.

(Flutter Developer – Burger King App) - Flutter, Clean Architecture, Api, Clean code, Dio, 3D

- Glass morphism design with smooth animations.
- A comprehensive mobile app designed for a seamless fast food ordering experience.
- This app was designed using Flutter and adheres to elegant design principles.
- It provides a user-friendly interface for browsing menus, customizing orders, managing shopping carts, and tracking order history.
- Authentication: Secure login/signup with guest mode support.
- Smart Cart: Real-time cart management with item customization.
- Responsive: Adaptive layouts for all screen sizes.
- Performance: Optimized with lazy loading and efficient state management.
- 3D product previews (Model Viewer).

Word2Pdf App – Flutter, Flask, Railway

- Instant Word→PDF conversion (Flutter frontend + Flask/LibreOffice backend); supports .docx/.doc/.rtf/.odt.
- In-app preview, conversion history, sharing, and mobile file picker.
- Tech: Flutter (file_picker, http, pdfx, share_plus, shared_preferences, lottie), Flask (Python 3.11), Docker.
- Live backend on Railway.

X Air Transfer App – Flutter, Wi-Fi Direct

- Cross-platform Flutter app for ultra-fast, offline file & message transfer via Wi-Fi Direct (P2P) no internet or router required.
- Features: high-speed large file transfer with progress, real-time chat, built-in speed test, multi-language (EN/AR), light/dark themes.
- Tech: Flutter + MethodChannel to native Wi-Fi Direct APIs; event-driven WiFiDirectController/Service for state management.
- Five tabs: Connection, Chat, Speed Test, File Transfer, Settings (optimized for Android).

Key Achievements

- **Mobile Application Development:** Successfully developed and launched multiple user-friendly and efficient mobile applications, showcasing advanced technical expertise, strong problem-solving ability, and delivery within tight deadlines.

Volunteer Experience

- **Be My Eyes:** Assisted visually impaired individuals by providing real-time support and guidance through the mobile application.
- **Harvard Society:** Volunteered at Harvard University, supporting learners by answering programming questions and providing guidance on available courses.

Certifications

- CS50's Introduction to Programming with Python – Harvard University
  Completed nine problem sets and a final project, demonstrating foundational programming and problem-solving skills.
- Flutter Developer – ITI (Egyptian Ministry of Communications)
  Achieved formal certification in Flutter development, covering cross-platform mobile application design and deployment.

Skills

Personal Skills:
Communication | Teamwork | Time Management | Problem Solving | Adaptability Attitude

Technical Skills:
Flutter | Dart | Bloc | Cubit | Provider | Riverpod | MVVM | MVC | Clean Code | SOLID Principles | Clean Architecture | Problem Solving | Python | RESTful APIs | Firebase | Git/GitHub | VS Code | Android Studio | Postman | SQLite | Hive | Firebase Firestore | CI/CD | Testing | Analytics | Debugging | API integration | Jira | Slack | Flet | Android Native | Kotlin

Languages

- **Arabic:** Native | **English:** Intermediate | **German:** A1

Military Service

- **Status:** Service Completed **(**Sep 2024 – Sep 2025**)**
